

Manoj Maheshwar Jagadeesan

Product Engineer & Product Manager | AI-Native Prototyping | Interaction Design & Growth Experimentation
Portfolio: manoj.ai / New York, NY / +1 716-750-9384 / manojmaheshwarjg@gmail.com / [LinkedIn](#) / [GitHub](#)

Product manager and two-time founder who ships code. Delivered 40+ client projects across two product studios (\$35k+ revenue), led 8 products in a \$2M+ revenue startup portfolio, and launched an open-source AI tool with 5,000+ downloads.

Now builds production-stack prototypes for global pharma clients with Claude Code. M.S. in Artificial Intelligence.

PROFESSIONAL EXPERIENCE

Product Management Intern, VivPro Corp

Mar 2026 - Present / Jersey City, USA

- Built **15+ end-to-end functional prototypes** on the production tech stack with Claude Code, designing UX flows to the existing design system so each became the engineering build spec, not a throwaway wireframe.
- Designed the **interaction layer** of every prototype: loading, empty, and error states, transitions, and focus states.
- Moved client validation ahead of development: defined the problem and success criteria up front, then aligned a **10-12 engineer team** on a working prototype, cutting post-launch rework.
- Embedded with **leading global pharmaceutical clients**, turning ambiguous, domain-heavy requirements into working software under regulatory, compliance, and data-handling constraints.

Founder/ Engineer, Hurrae (Product Studio)

May 2023 - July 2024 / Chennai, India

- Built [Hurrae](#) as a solo founder: delivered **10+ production web applications** and product designs for US startups and investment firms, generating **\$20k in revenue** and owning scoping through client handoff.
- Key clients: [Sixfold](#) (AI insurtech; marketing site shipped in one week), [Aerodei](#) (HR tech; app and website UI/UX), [North Hudson Resource Partners](#) (energy investment), and [The Carlyle Group](#) (portfolio management).

Associate Product Manager, Favcy (Venture Builder)

Nov 2022 - Oct 2023 / Delhi, India

- Led data-driven product strategy and technical workflows for **8 products** in a **\$2M+ revenue** startup portfolio, from discovery and success metrics through launch.
- Shipped **LLM-powered features** in 2022-23 (recommendation, search, chat, and content generation) using fine-tuning and prompt engineering.
- Ran **60+ user interviews** and **25+ A/B experiments**, using SQL and Python for behavioral and funnel analysis to pinpoint drop-offs, with cross-functional teams of 10+ engineers and designers in agile sprints.

Co-founder/ Engineer, Zedtribe (Product Studio)

Apr 2021 - Oct 2022 / Chennai, India

- Co-founded [Zedtribe](#) and delivered **30+ client engagements** across diverse industries, generating **\$15k in revenue**.
- Led end-to-end full-stack development, product design, and direct client management for every engagement.

Software Analyst, Teknounce

Jan 2020 - Jan 2021 / Chennai, India

- Built **8 AI/ML data science products** with a cross-functional team of 12 engineers and designers, defining 150+ user stories and technical specs and delivering 85% of features within MVP timelines.
- Defined requirements and user workflows for **6 communication tools** from 50+ stakeholder interviews across 4 personas, turning insights into 65 prioritized features and improving development velocity by 35%.

PROJECTS

SnapInfra - AI Infrastructure Code Generation Platform

2025

- Launched an open-source AI CLI (Apache 2.0) that generates infrastructure code and architecture diagrams from the terminal, reaching **5,000+ PyPI downloads** with ~290 new downloads a month. PyPI: [snapinfra](#), GitHub: [snapinfra-cli](#)
 - Built an **AI platform** that turns plain-language requirements into production-ready architecture blueprints, C4 diagrams, backend code, database schemas, and infrastructure code for AWS/GCP/Azure, with streaming output and PNG export.
- Live: [snapinfra.ai](#), GitHub: [snapinfra-platform](#)

RebateOS - AI Rebate & Contract Management for Healthcare Finance

2025

- Built a **RAG-powered conversational AI platform** processing 1,000+ healthcare contracts and 200,000+ purchase orders (Pinecone, LangChain, Mistral OCR) with **90%+ extraction accuracy**, conflict detection, and source citations.
- Automated contract extraction, tiered rebate calculations, accrual forecasting, and dispute resolution. GitHub: [RebateOS](#)

ScootPie - AI Shopping Assistant with Computer Vision

2025

- Built an **AI shopping assistant** on the Gemini API with virtual try-on, swipe-based product discovery, outfit generation, and a 360° 3D view. Live: [scootpie.com](#), GitHub: [scootpie](#)
- Implemented an **IDM-VTON try-on pipeline** on Stable Diffusion XL (two-parallel-UNet architecture), with SCHP human parsing, DensePose UV mapping, and OpenPose keypoints in the data pipeline.

SKILLS

- Product:** Rapid Prototyping, PRDs & User Stories, Roadmapping, User Research, Client Demos, Agile/Scrum, Jira, Figma
- Growth & Analytics:** A/B Testing, Funnel Analysis, Behavioral Analytics, SQL, Amplitude
- Front-End & Interaction:** React, Next.js, TypeScript, Tailwind CSS, Framer Motion, React Flow, Design Systems
- AI & LLMs:** Claude Code, OpenAI/Gemini/Groq APIs, LangChain, RAG, Fine-Tuning, Prompt Engineering, Transformers
- Machine Learning & Data:** TensorFlow, PyTorch, Scikit-learn, XGBoost, Pandas, NumPy, Airflow, Spark, Kafka
- Backend & APIs:** Python, Node.js, FastAPI, Flask, Express.js, REST APIs, GraphQL
- Databases & Infrastructure:** PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch, Docker, Kubernetes, Terraform
- Cloud & MLOps:** AWS (S3, EC2, Lambda, SageMaker, RDS, Redshift), CI/CD (Jenkins, GitHub Actions), MLflow

EDUCATION

University at Buffalo, SUNY, New York - M.S., Artificial Intelligence

Aug 2024 - Jan 2026

Anna University, India - B.E., Electronics & Communication

Aug 2015 - May 2019
